Serenity Education and Day Treatment Center In-Person Learning Plan (July 2022)

Serenity Education Students and Staff members have returned to full in-person learning on campus. Serenity Education has created an online platform where students can gain access to special educators and relative service providers via Zoom and Google Classroom in the event that a student must quarantine due to Covid-19 related illness. Students received Chromebooks for online learning and classroom teachers will provide families with the access information for online learning if the need arises.

Serenity Education will follow and apply all relative CDPHE and Tri-County Health Department guidelines with regard to the Covid-19 pandemic. Serenity Education has developed a Covid-19 Protocol and Procedures based upon these state and county guidelines. Serenity Education will utilize enhanced cleaning measures in their buildings and programs to reduce the likelihood of spread of illness. Serenity Education will focus on symptom screening, hand washing, social distancing, and other measures to address the Covid-19 pandemic in its' educational program.
